

Bloom Health Partners Expansion in Dallas Well-Timed as Vaccine and Testing Deadlines Announced by the U.S. Federal Government

New Dallas, TX Area location serves as a hub location for U.S. client operations that yielded \$11.88M USD (unaudited) in revenue in the first half of 2021

VANCOUVER, BC, November 9, 2021 – Bloom Health Partners Inc. (“**Bloom**”) (CSE: BLMH, OTC Pink: MHTCF, FRA: D84), a global platform for healthcare security, announces the opening of new facilities in the Dallas, Texas area later this month. Bloom has also added additional key operations resources to support growing demand from clients. Official opening of the new Dallas area facilities comes just after the U.S. Federal Government’s [announcement](#) requiring vaccinations or testing for U.S. based companies administered by the Occupational Health and Safety Administration (OSHA) and [additional announcements](#) last week enforcing vaccinations among the workforce by January 4, 2022.

The new Dallas location includes offices for operations and expanded laboratories for diagnostic testing to meet rapidly growing demand. Prior to acquisition, announced on July 14, Bloom’s U.S. testing business achieved revenues of approximately \$11.88M USD for the first half of 2021 with related operating expenses for the same period totaling \$4.73M USD as captured in the Business Acquisition Report (BAR), available on Sedar (<https://www.sedar.com>). Testing and data for Movie/TV productions, Fortune 500 thus far, serve as a base-line for expanding capabilities with Bloom’s complete platform that integrates testing with employee vaccination data management for organizations required to comply with the recently announced mandates. Bloom’s rapidly evolving technology platform can help organizations both set their policies for risk management and show compliance to regulators if desired.

“Our Dallas location will support our mission of ‘unstoppable is possible’ for our clients,” said Andrew Morton, CEO of Bloom. “Pending mandates and ongoing variants have placed an emphasis on needs for long-term reliable testing for COVID-19 coupled with vaccine management among other on-site health services in demand. By tying together health services with data-driven intelligence, we can help organizations run more efficiently well into the coming decade. Expanding our facilities in Dallas enables us to maintain a high-level of service for our growing client base as we solidify our position as a next generation occupational health provider delivering Occupational Health-Tech.”

Bloom cautions that figures for revenue and expenses generated in the first six months of 2021 have not been audited, and are based on calculations prepared by management. Actual results may differ from those reported in this release once these figures have been audited.

About Bloom Health Partners Inc.
